

What the Data Show: Academic Engagement and Achievement Among Students in Foster Care

October 4, 2024

Danielle Wondra, Children Now

Child Welfare Senior Policy and Outreach Associate

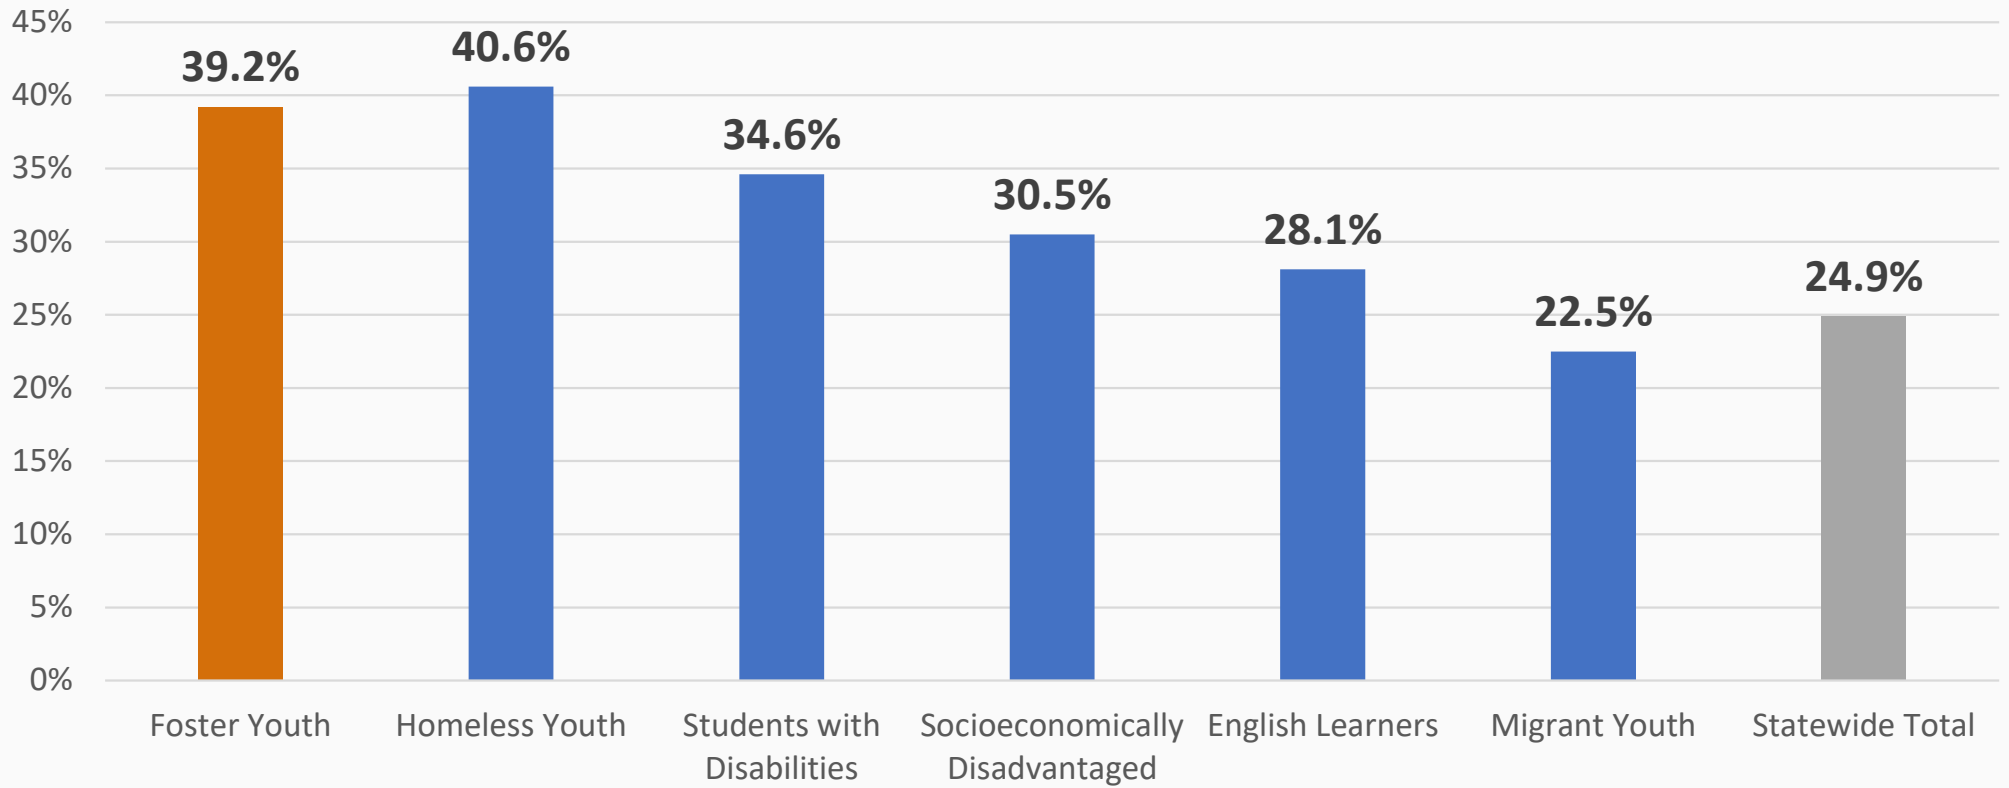

dwondra@childrennow.org

Background

- Students in foster care face unique challenges that can disrupt their learning.
- Due to these challenges, students in foster care experience worse academic outcomes than other high-need students.
- The Local Control Funding Formula (LCFF) identifies youth in foster care as one of three student groups needing additional services and supports.
